

**Monday 20th April**

Hello year 2  
parents and children,

I hope you have  
enjoyed what would have been your Easter break and the lovely weather we have  
been having.

This week the  
daily emails will start again and I will put a few challenges in each email  
again. Thank you again to the parents who have been sending me their children's  
work/things they have been doing it in their house, it really is so lovely to  
see.

You should have  
received your home learning packs for after the holidays. In these packs, I  
have included a range of activities for English, Maths and Science. All of the  
activities I have chosen are things we have covered in school so children  
should be able to complete these with minimal support.

**Today's challenges –**

- Learn to say hello in three new languages.  
Create a poster to show what you have learnt.
  
- Invent your own robot. What will it be use  
for? What special features does it have? Draw a picture of your new robot.

For a challenge, write a description of your robot pretending you are trying to sell it to someone.

We are all missing you and cannot wait to get back to normal and have a full class of children again.

Don't forget to email me with anything you need. Enjoy your day and continue to keep safe!

Kind regards,

Miss Hall
